## Breakout sessions

### 1 **The latest trends in cyberattacks: Technology Watch from PwC Lu's Ethical Hackers**

Both traditional and new media are increasing their coverage of cyberattacks, and the number of reported breaches and victims keeps growing. Cybercrime is a real and fast-growing concern for companies across all industries, but the amount of available information has reached impractical levels. However, there is a lot to learn from these events.

This breakout session is aimed at updating you on the most significant and latest cyberattack trends that our team of Ethical Hackers has observed in the past year.

**Moderator:**

**Maxime Clementz** – Ethical hacker & Cyber Security Manager, PwC Luxembourg

### 2 **Game of Threats™**

Game of Threats™ is a digital game designed to simulate the speed and complexity of an actual cyber-breach. Our game forces players to make choices about how to attack (if playing the threat) and defend (if playing the company) with limited information and to balance investment between capability and responding to the other team's actions and plans.

**Moderator:**

**Vincent Villers** – Cyber Security Leader, PwC Luxembourg

### 3 **New European Public-Private Partnership in the area of cybersecurity, industrial research and industry.**

A few months ago, the European Commission launched a new public-private partnership on cybersecurity that is expected to trigger €1.8 billion of investment by 2020. This is part of a series of new initiatives to better equip Europe against cyberattacks and to strengthen the competitiveness of its cybersecurity sector.

Today's action plan includes the launch of the first European public-private partnership on cybersecurity. The EU will invest €450 million in this partnership as part of Horizon 2020, its research and innovation programme. Cybersecurity market players, represented by the European Cyber Security Organisation (ECSO), are expected to invest three times as much. This partnership will also include members from national, regional and local public administrations, research centres and academia. The aim of the partnership is to foster cooperation in the early stages of the research and innovation process and to build cybersecurity solutions for various sectors, such as energy, health, transport and finance.

This breakout session will be an opportunity to obtain more information on this initiative and will help you understand the benefit it can bring you.

**Moderator:**

**François Lavaste** – Head of CyberSecurity at Airbus DS – Vice-chairman of ECSO (European Cyber Security Organisation)

# Agenda

## 4 Key findings from the “Out of the shadows: CISO in the spotlight!” survey and open discussion – CISO’S role and responsibilities

The CPSI (Collège des Professionnels de la Sécurité de l’Information) and PwC would like to share with you the results of their joint survey, “Out of the shadows: CISO in the spotlight!”

Conducted in May 2016, this survey aims at analysing the roles and responsibilities of CISOs in Luxembourg to get an overview of the current situation.

**Moderators:**

**Rodolphe Mans** – President, CPSI (Collège des Professionnels de la Sécurité de l’Information)

**Ludovic Raymond** – Cyber Security Director, PwC Luxembourg

## 5 Match Making session

Want to discover how the companies in the Local to Global competition are shaping future trends? Curious about how they can bring value to your organisation? If you’re interested in meeting some of the entrepreneurs presenting during the event, seize the opportunity during this hour to meet them and share experiences.
